

International Transfers Page

This page lists policies and procedures for students looking to continue their SE training in a different country from the one in which they began their training. For all transfer requests, please be sure to notify your current coordinator (in the United States) or organizer (outside the United States) of your intent to transfer, as well as the coordinator or organizer of the training you wish to attend.

Please note that all transfer requests for trainings in a different country will require you to provide proof of the modules you have previously attended. For this reason, we strongly recommend that you retain your certificate of completion from each module* as well as a record of the session and supervision credits you have obtained for each level. All trainings that do not fall under the purview of the European Association of Somatic Experiencing (EASE) or Brazil are within the purview of Somatic Experiencing® International (SEI), and all students in those trainings will be required to complete the requirements of SEI graduation for an SEP certificate.

European Association of Somatic Experiencing (EASE) requirements:

- EASE allows a **maximum of 12 training days** to be completed online. Students who transfer to a European training from outside of Europe are also subject to these requirements. Please note that students who transfer to an EASE country who do not meet these requirements may be asked to re-take one or more modules in person. Please also note that hybrid modules are not counted as in-person modules.
- To transfer into an EASE training and receive an EASE SEP certificate, students must meet EASE graduation requirements. EASE countries **require a minimum of 15 personal sessions and 18 case consultations**. Some countries may require additional sessions and consultations. Students will obtain their certificate from the organizer in the country where they completed the most modules, provided they meet the appropriate graduation requirements.
- Each organizer reserves the right to accept or reject a transfer request from another country or region.
- International organizers conduct their businesses independently from SEI, and the cost of each training module varies by country and region. It is the student's responsibility to determine the cost and payment terms of the training to which they would like to transfer. This information can be obtained by [contacting the organizer directly](#).
- Please note that **scholarships do not automatically transfer from one country to another**. Depending on the country to which a student transfers, it may be necessary to re-apply for a scholarship, or a scholarship may not be available.

For a list of EASE countries, please see their website [here](#).

*Students who wish to transfer between trainings who are missing completion certificates from modules taken with SEI should contact Evaluations@traumahealing.org to request copies.
